

“PRIYANSHU TIWARI

Full-Stack Developer | MERN Stack | TypeScript | Next.js | GenAI

9630815802 | ppriyanshuttiwari2003@gmail.com | Indore | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building and deploying web applications using the MERN stack, TypeScript, and modern AI technologies. Experienced in developing REST APIs, authentication and role-based access control, payment integrations, third-party APIs, and GenAI-powered features including structured outputs and SSE streaming. Strong foundation in Java, Data Structures Algorithms, and Object-Oriented Programming, with a focus on building practical and scalable applications.

TECHNICAL SKILLS

Languages	JavaScript, Java, SQL
Frontend	React.js, HTML5, CSS3, Bootstrap, Responsive Design
Backend	Node.js, Express.js, REST APIs, Middleware, API Integration
Database	MongoDB, Mongoose
Auth & Security	JWT, HTTP-only Cookies, Authentication, Authorization, Role-Based Access Control
AI / GenAI	LLM API Integration, Prompt Engineering, Structured Outputs, SSE Streaming
APIs & Services	Razorpay, Cloudinary, Google Maps API, External REST APIs
Tools	Git, GitHub, Postman, VS Code

PROJECTS

Cravings – Full-Stack Food Delivery Platform (Live)

[GitHub](#) | [Live Demo](#)

Technologies: React.js · Node.js · Express.js · MongoDB · Razorpay · Cloudinary · Google Maps

- Built and deployed a multi-role food delivery platform with dedicated workflows for Customers, Restaurants, Riders, and Admins.
- Implemented JWT-based authentication and role-based access control to secure protected REST APIs and application workflows.
- Developed end-to-end restaurant ordering and order-status workflows, including customer ordering, restaurant processing, rider pickup, and delivery tracking.
- Integrated Razorpay payment processing, Cloudinary media uploads, GPS-based rider tracking, Google Maps navigation, and order tracking.

VerdantX – Environmental Intelligence & Health Advisory Platform (Live)

[GitHub](#) | [Live Demo](#)

Technologies: React.js · Node.js · Express.js · MongoDB · Groq AI · Leaflet · SSE

- Built environmental dashboards integrating real-time AQI and weather APIs with an EPA-based risk engine for environmental health classification.
- Integrated Groq LLMs to generate structured health reports and developed an SSE-streaming environmental AI assistant for incremental responses.
- Developed route pollution analysis, civic issue reporting, automated alerts, and Leaflet-based environmental mapping using multiple external APIs.

Mitra – Real-Time Multimedia Chat Application (Live)

[GitHub](#) | [Live Demo](#)

Technologies: React.js · Node.js · Express.js · MongoDB · Socket.IO · Google OAuth

- Built a full-stack real-time chat app with a hybrid messaging pipeline—routing text over persistent WebSocket connections while handling images and PDFs up to 25MB through a separate media upload flow—with live typing indicators, read receipts, and multi-tab presence sync.
- Implemented dual authentication with JWT and Google OAuth 2.0, including automatic account linking, and designed a MongoDB aggregation pipeline to generate conversation previews and unread counts in a single query.

CERTIFICATIONS

Full Stack Web Development Certification – RICR, Bhopal

- Completed structured training in MERN stack development (React.js, Node.js, Express.js, MongoDB).
- Covered Data Structures & Algorithms (Java) and Object-Oriented Programming (Java) with hands-on projects and assessments.

EDUCATION

Master of Computer Applications (MCA) – 7.5 CGPA

RGPV University, Bhopal | 2024 – 2026

Bachelor of Computer Applications (BCA) – 7.7 CGPA

LNCT University, Bhopal | 2021 – 2024
